Art Unit: 3748

Applicant's amendment dated April 05, 2002, has been fully considered.

Newly added claims 12-17 are not allowable over the prior art of record. A new ground of rejection has been made.

Also, original claim 4 is not allowable. In the previous rejection, the Examiner made a typographical error in that the 103 rejection to claim 3 based on Barrett in view of Ferch was meant to reject claim 4 because in claim 4, applicant simple recites the belts which are clearly not an allowable subject matter.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 12-17, are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. 4718233 (Barrett).

Barrett discloses an electricity generating method comprising a solar panels 10 acting as a power source which is mounted on top of a house (lines 62-64, column 2) to a power storage base (batteries 24); a portion of the power from said batteries are driving an electric motor 22, the output of said motor (second power portion) is clearly driving a generator 56 for generating

Art Unit: 3748

electricity then the electricity is stored inside a battery 24 (third power portion), or to an electrical service utility company (fourth power portion) (lines 37-41, column 2). Regarding claim 14, coupling 28, shaft 31..etc... can be considered as transmission means. Regarding claim 15, Barrett clearly shows that more than one battery 24 is used. Regarding claim 16, figure 1 of Barrett indicates an AC generator 56. Regarding claim 17, Barrett discloses a solar panels 10.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. § 103(a) as being unpatentable over U.S. 4718233

 (Barrett) in view of U.S. 5853215 (Lowery) and U.S. 6311487 (Ferch).. Barrett discloses all the claimed subject matter as set forth above in the rejection of claim ¹²~~8~~ but does not disclose a breaker box, and the belts. Lowery is relied upon to disclose that it's well known to have a breaker box 74 with other power generating devices. Ferch is relied upon to disclose that it's well known to use belts 126 for transmitting power between an electric motor 120 and a generator 128. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to provide a breaker box in the house of Barrett as taught by Lowery for the purpose of controlling the electrical signals and loads in the house, and to use belts for

Art Unit: 3748

transmitting power between the electric motor and the generator of Barrett as taught by Ferch for the purpose of being able to locate the generator far away from the motor.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
